In Harmony with Nature

Seeing the invisible

Xavier Dobrzański
Maciej Gościński

Human - integral part of natural ecosystem

Correlation within ecosystems

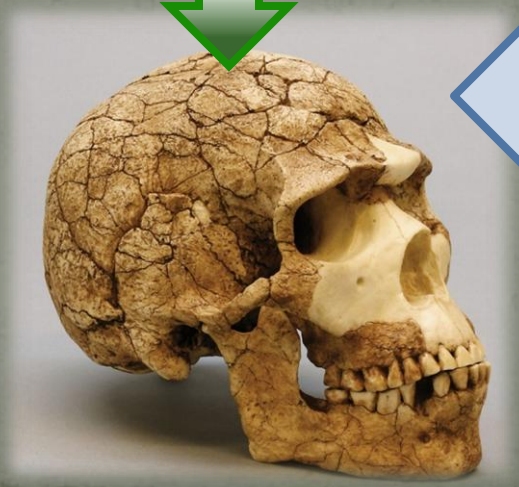

Human species in the ecosystem

Past

Now

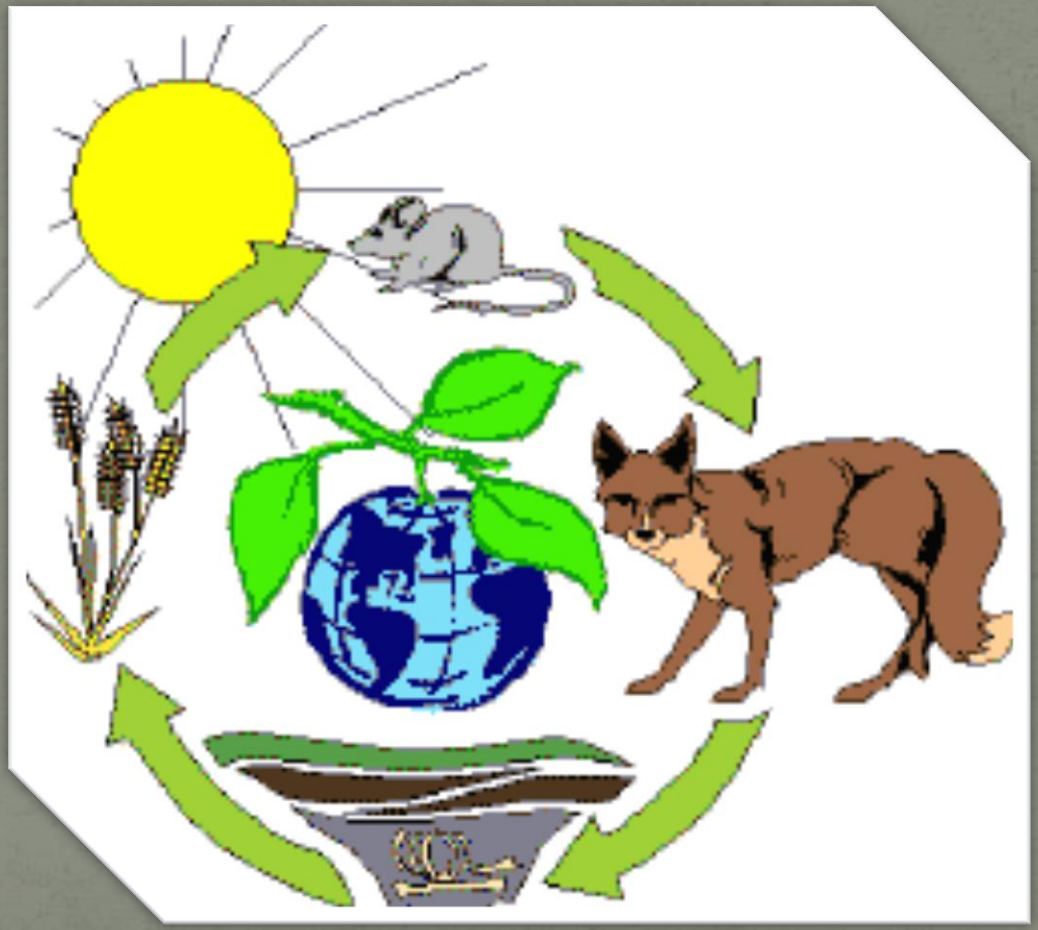

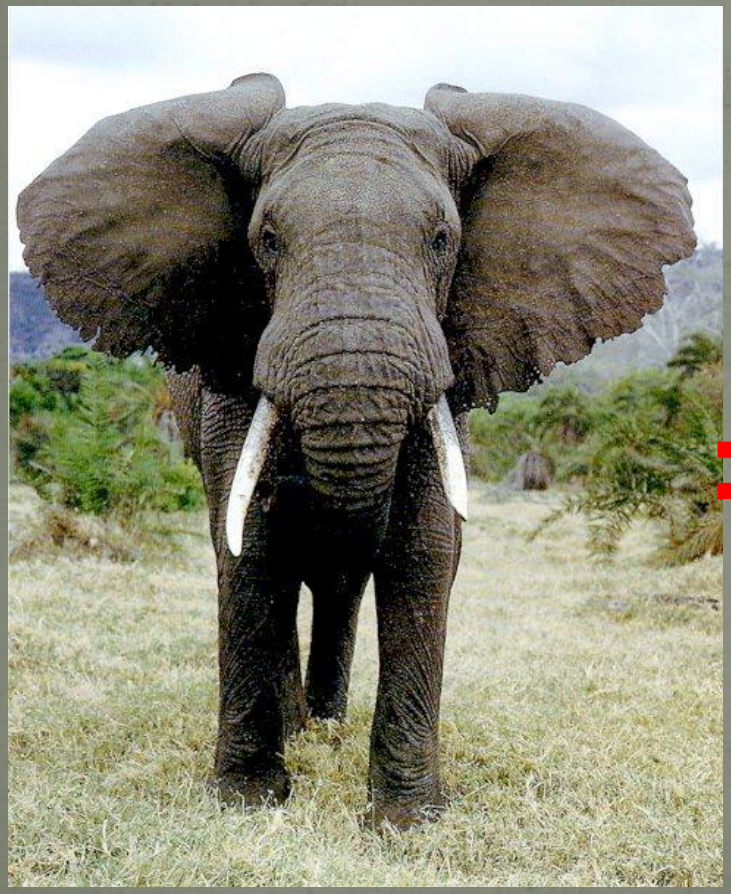

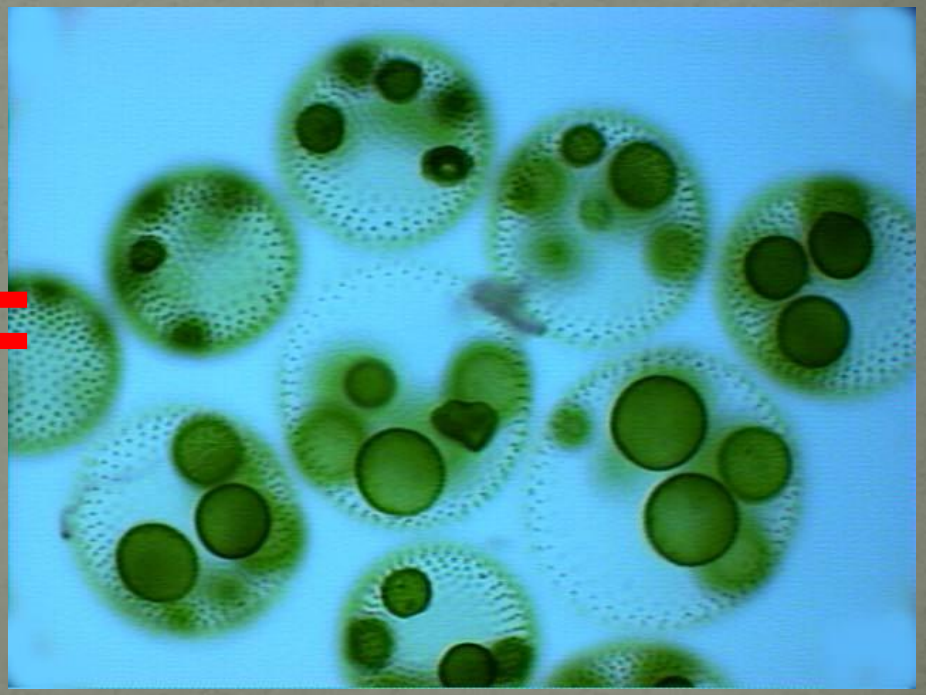

Human being dependent on nature: no animals/plants = no human

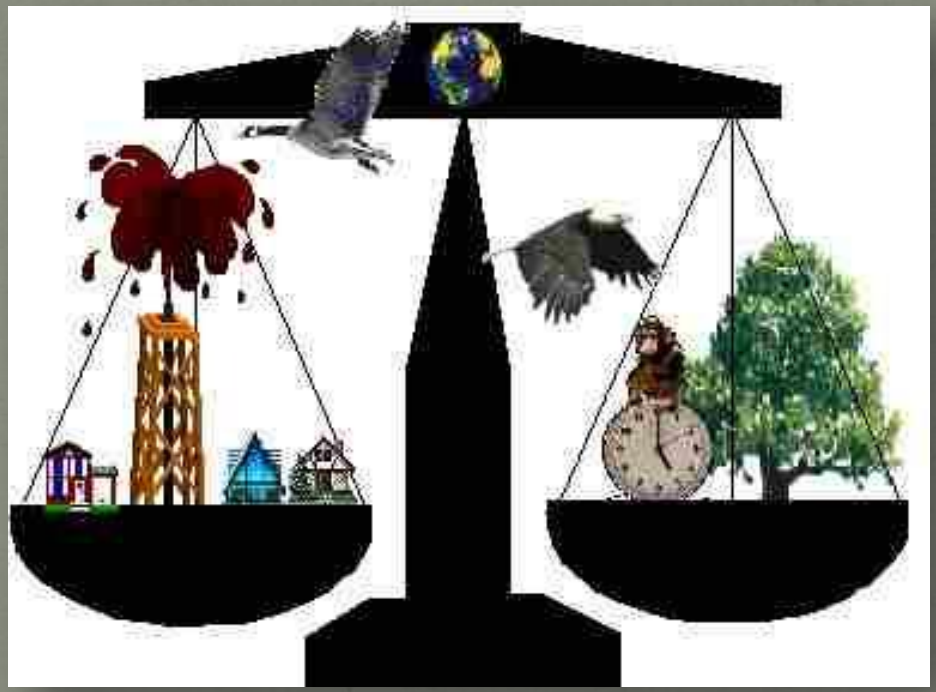

Everyone is important

=

Human + environment must be in balance

The beauty of Thai nature

Farm Chokchai 12.08-15.08.2011

Butterflies are pollinators

Nymphalidae larva

Lasiocampiini tribe

Sphingidae species

Nymphalidae species chrysalis

All predators keep the number of other species at certain level

Pest control

Balance in the ecosystem

Praying mantis

female

Sphondromantis species; male

Dragonfly

Gekko gecko

Banded bullfrog

Buffo species

Julidae species

Wolf spider

Jumping spider

Slug species

Giant snail

2:00 AM
female
Oryctes sp.

Longhorn beetle species

Termite's home

Remember!

- We are a part of the ecosystem – all elements important!
- Dependant on nature
- Human & Environment in balance
- Every species is needed, even the tiniest one.
